

bq769x0 Pin Equivalent Diagrams

Vinod Mukundagiri and Garry Elder

Battery Management Solutions – GMAP

ABSTRACT

This application note contains diagrams of the pin equivalent circuits for each of the pins in the bq76920, bq76930, and bq76940 devices.

Contents

1	Introduction	1
2	Pin Configurations	1
3	Equivalent Pin Diagrams.....	2

1 Introduction

The bq769x0 family of robust analog front-end (AFE) devices serves as part of a complete pack monitoring and protection solution for next-generation, high-power systems, such as light electric vehicles, power tools, and uninterruptible power supplies.

In many of these applications, a variety of failure mode effects analysis (FMEA) may be undertaken. To support this, and other kinds of design analysis, an additional level of information regarding the IC pins may be required and is presented in this document.

Related Documentation

For related documentation, see the following:

- [bq769x0 Data Sheet \(SLUSBK2\)](#)
- [bq76920 Evaluation Module User's Guide \(SLVU924\)](#)
- [bq76920, bq76930, bq76940 AFE FAQ \(SLUUB41\)](#)

2 Pin Configurations

The bq769x0 family is made up of three different devices, the bq76920, bq76930, and bq76940.

All trademarks are the property of their respective owners.

3 Equivalent Pin Diagrams

DEVICE	PIN NAMES	EQUIVALENT PIN DIAGRAM
bq76920	VCn = VC2, VC3, VC4, VC5	
bq76930	VCn = VC2, VC3, VC4, VC5, VC7, VC8, VC9, VC10	
bq76940	VCn = VC2, VC3, VC4, VC5, VC7, VC8, VC9, VC10, VC12, VC13, VC14, VC15	
bq76920	VCn = VC1	
	VCn-1 = VC0	
bq76930	VCn = VC1, VC6	
	VCn-1 = VC0, VC5b	
bq76940	VCn = VC1, VC6, VC11	
	VCn-1 = VC0, VC5b, VC10b	
bq76920	CAPn = CAP1	
bq76930	CAPn = CAP1, CAP2	
bq76940	CAPn = CAP1, CAP2, CAP3	

DEVICE	PIN NAMES	EQUIVALENT PIN DIAGRAM
bq76920, bq76930 and bq76940	REGOUT	
bq76920	TSn = TS1	
	TS- = VSS	
bq76930	TSn = TS1, TS2	
	TS- = VSS, VC5x	
bq76940	TSn = TS1, TS2, TS3	
	TS- = VSS, VC5x, VC10x	
bq76920, bq76930 and bq76940	Pin = SDA, ALERT	

DEVICE	PIN NAMES	EQUIVALENT PIN DIAGRAM
bq76920, bq76930 and bq76940	Pin = BAT, REGSRC	
bq76920, bq76930 and bq76940	Pin = CHG, DSG	
bq76920, bq76930 and bq76940	SRP, SRN	

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
