# RadioVerse: TECHNOLOGY AND RADIO DESIGN ECOSYSTEM

Visit [analog.com/radioverse](http://analog.com/radioverse)

**CONCEPT TO  
CREATION AT  
LIGHT SPEED**

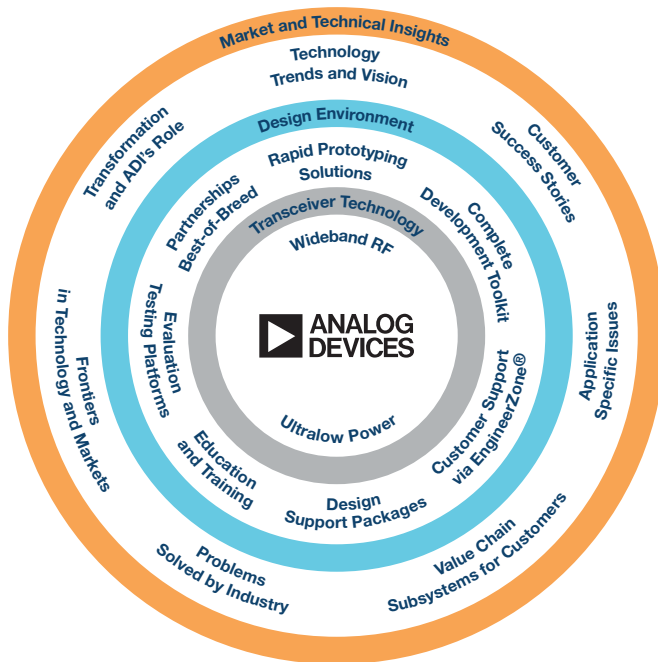

Insatiable consumer appetite for data and connectivity is creating difficult wireless communications problems.

Radio technology is a pervasive and crucial part of wireless communication systems that cuts across many different industries and applications. From base stations, drones, and military communications, to car to car connectivity and IoT networks; radio technology is at the core. Our customers—constrained by faster time to market, slashed R&D budgets, and lack of expertise—need quick radio solutions more than ever before.

Analog Devices launched a radio design and technology ecosystem destination for our customers to solve their toughest radio challenges.

Our goal is to help our customers by listening, anticipating future needs, and communicating key insights to help solve all their radio challenges. We offer a range of technologies, software, tools, evaluation and prototyping platforms, and full radio solutions. And if we can't support customers' needs, we have an ADI approved radio technology global partnership network who can.

## RadioVerse Consists of The Three Pillars

### Market Leading Radio Technologies

Advanced and innovative RF and mixed-signal solutions targeting applications where robust performance, power consumption, and footprint are critical success metrics. Combining expertise in radio architectures, signal processing, circuit design, and semiconductor process technologies, RadioVerse™ technologies drive breakthroughs in RF connectivity, drastically reducing time to market and total cost while meeting the tough technical challenges of the future.

### Radio Design Environment

To get our customers to market as quickly as possible, we provide board support packages, software, tools, reference designs, and modules with the help of many ADI approved partners to simplify radio development across a wide range of applications.

### Accessible Expertise

ADI offers support and education with our technical experts. We strive to give customers market and technical insights, and solutions for common radio architecture problems in the form of technical articles, how-to videos, white papers, etc.

**Brand Goal: We want customers to think of ADI's RadioVerse as a destination to go first for solving their difficult radio challenges.**
