

Evaluating the **ADF4355** Microwave Wideband Synthesizer with Integrated VCO

FEATURES

- Self contained board, including **ADF4355** frequency synthesizer with integrated VCO, differential 122.88 MHz temperature controlled crystal oscillator (TCXO), loop filter (20 kHz), USB interface, and voltage regulators**
- Windows®-based software allows control of synthesizer functions from a PC**
- Externally powered by 6 V**

EVALUATION KIT CONTENTS

EV-ADF4355SD1Z

USB cable

EQUIPMENT NEEDED

- Windows-based PC with USB port for evaluation software**
- System demonstration platform, serial only (**SDP-S**)**
 - EVAL-SDP-CS1Z controller board**
- Power supply (6 V)**
- Spectrum analyzer**
- 50 Ω terminators**

ONLINE RESOURCES

Documents Needed

- [ADF4355 data sheet](#)
- [EV-ADF4355SD1Z user guide](#)
- [PLL Software Installation Guide](#)

Required Software

- Analog Devices, Inc., [ADF4355 software, Version 0.46.1 or higher \(available for download at \[www.analog.com/ADF4355\]\(http://www.analog.com/ADF4355\)\)](#)

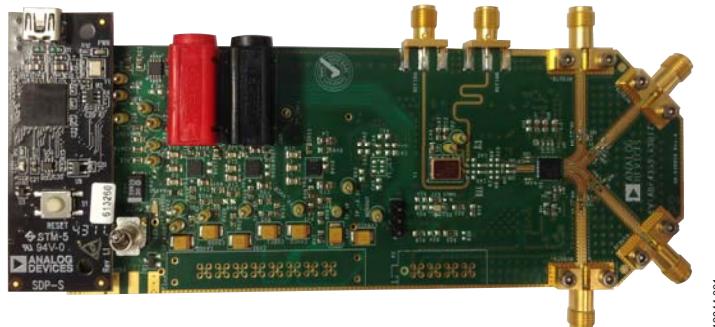

GENERAL DESCRIPTION

The **EV-ADF4355SD1Z** evaluates the performance of the **ADF4355** frequency synthesizer with integrated VCO for phase-locked loops (PLLS). A photograph of the evaluation board is shown in Figure 1. The evaluation board contains the **ADF4355** frequency synthesizer with integrated VCO, a differential 122.88 MHz reference (TCXO), a loop filter, a USB interface, power supply connectors, and subminiature Version A (SMA) connectors. A USB cable is included to connect the board to a PC USB port.

For easy programming of the synthesizer, download the Windows-based software from www.analog.com/ADF4355.

This board requires an **SDP-S** (shown in Figure 1, but not supplied with the kit). The **SDP-S** allows software programming of the **EV-ADF4355SD1Z** device.

REVISION HISTORY

5/15—Revision 0: Initial Version

GETTING STARTED

SOFTWARE INSTALLATION PROCEDURES

See the [ADF4355](#) product page for the [EV-ADF4355SD1Z](#) control software. For the software installation procedure, see the [PLL Software Installation Guide](#).

EVALUATION BOARD SETUP PROCEDURES

To run the software,

1. Click the ADF4355 file on the desktop or from the Start menu.
2. On the **Select Device and Connection** tab, choose **ADF4355 and SDP board (black)**, and then click **Connect** (see Figure 2).
3. When connecting the board, allow 5 sec to 10 sec for the label on the status bar to change.

Under the **File** menu, the current settings can be saved to, and loaded from, a text file.

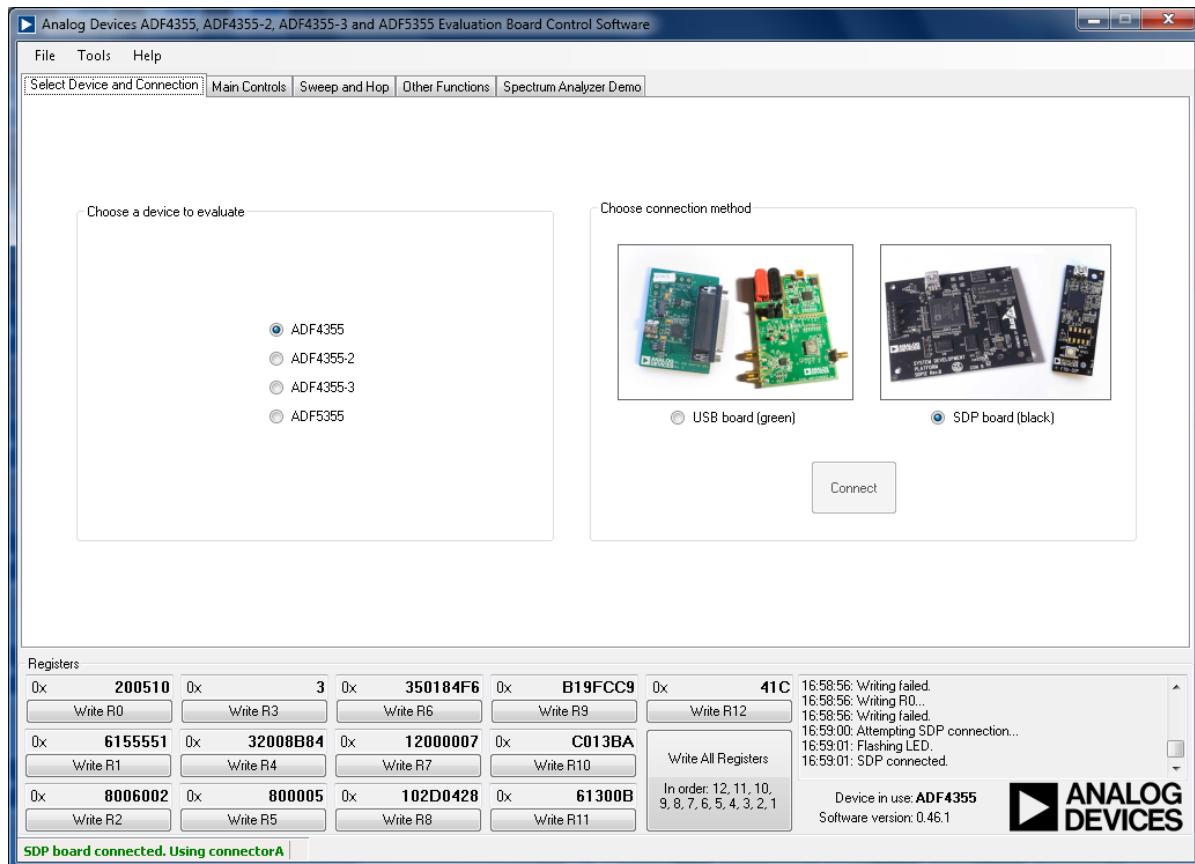

Figure 2. Software Front Panel Display—Select Device and Connection

EVALUATION BOARD HARDWARE

The EV-ADF4355SD1Z requires the SDP-S platform that uses the EVAL-SDP-CS1Z. (SDP-B is not recommended.)

The EV-ADF4355SD1Z schematics are shown in Figure 7, Figure 8, and Figure 9. The silkscreens for the evaluation board are shown in Figure 10 and Figure 11.

POWER SUPPLIES

The board is powered by a 6 V power supply connected to the red and black banana connectors. Connect the red connector to a 6 V power supply and the black connector to ground.

The power supply circuitry allows the user two or three separate low dropout (LDO) regulators to feed the ADF4355 (using fewer LDO regulators increases the risk of spur contaminated dc feeds).

The charge pump and VCO supply pins are driven from a 5 V ADM7150 high performance, low noise regulator. The remaining supplies are powered from 3.3 V ADM7150 high performance, low noise regulator.

LED1 indicates when the ADF4355 is powered on. Use Switch S1 to switch the 6 V to the board on and off.

RF OUTPUT

The EV-ADF4355SD1Z has two pairs of SMA output connectors: RFOUTA+/RFOUTA– and RFOUTB+/RFOUTB– (differential outputs). Because they are sensitive to impedance mismatch, connect the RF outputs to equal load impedances. If only one port of a differential pair is used, terminate the complementary port with an equal load terminator (in general, a 50 Ω terminator).

LOOP FILTER

The loop filter schematic is included in the board schematic in Figure 7. Figure 3 shows the loop filter component placements. For lowest rms phase noise, use the following components (that are inserted on the evaluation board) with a 0.9 mA charge pump current:

- C60 = 1.2 nF, C59 = 33 nF, C61 = 390 pF, C73 = 10 pF
- R14 = 1 kΩ, R17 = 3.3 kΩ

Narrower loop filter bandwidths have lower spurious signals.

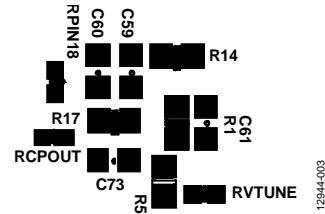

Figure 3. Loop Filter Placement

REFERENCE SOURCE

The evaluation board contains a 122.88 MHz differential output TCXO from Vectron International. If preferred, the user may supply either a single-ended or differential reference input to REFINA/REFINB SMA connectors. When using an external reference, remove R12 to disconnect the power rail to the TCXO.

To use a single-ended REFINx, connect a low noise 122.88 MHz reference source to SMA REFINB, and connect a 50 Ω terminator to SMA REFINA. Remove Resistor R27 (100 Ω). To use a differential REFINx, connect the differential signal to SMA REFINA and SMA REFINB. The differential REFINA/REFINB SMA connectors can operate to a 500 MHz input frequency.

In the schematic shown in Figure 7, the REF_{IN}A pin of U1 (ADF4355) is connected to SMA REFINB, and the REF_{IN}B pin of U1 (ADF4355) is connected to SMA REFINA. This schematic matches the evaluation board connections.

DEFAULT CONFIGURATION

All components necessary for local oscillator (LO) generation are inserted on the board. This board is shipped with the ADF4355 synthesizer with an integrated VCO, a differential 122.88 MHz reference TCXO, and a 20 kHz loop filter ($I_{CP} = 0.9 \text{ mA}$).

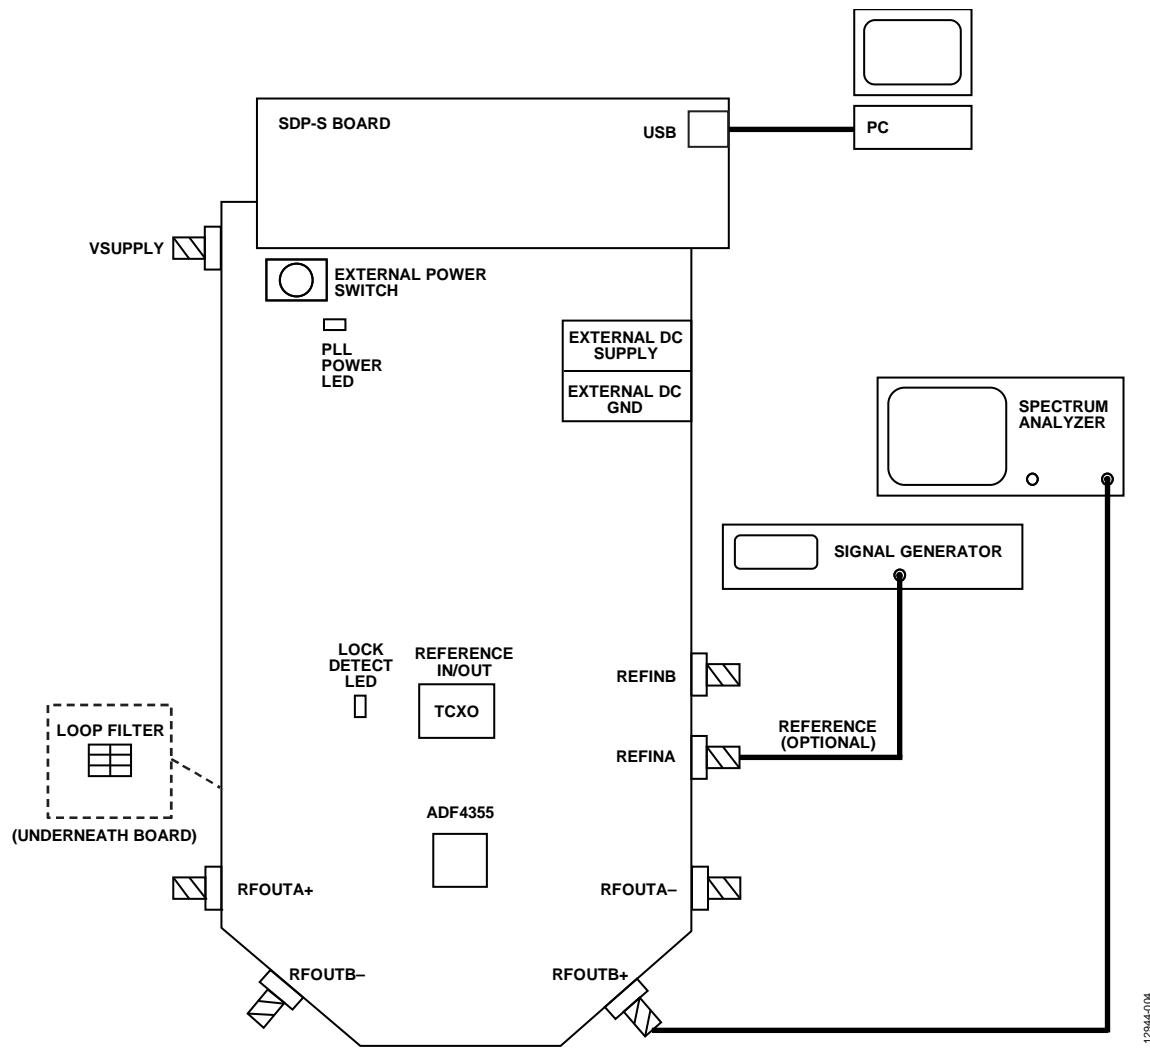

EVALUATION BOARD SETUP

Figure 4. Evaluation Setup Block Diagram

EVALUATION BOARD SOFTWARE

MAIN CONTROLS

The **Main Controls** tab (see Figure 5) selects the RF and user configurable register settings. Consult the register descriptions of the [ADF4355](#) data sheet for details. Default settings are recommended for most registers.

In the **RF Settings**, ensure that **VCOout (MHz)** equals the VCO frequency. Set the **Output divider** to give the required **RFoutA± (MHz)**.

Ensure that **Reference freq** equals the applied reference signal. The PFD frequency is calculated from the reference frequency, the R counter, the reference doubler, and the reference divide by 2. Ensure that the value in **PFD (MHz)** matches the value specified in the loop filter design.

In **Register 4**, program the **CP current** to match the value used for the loop filter design.

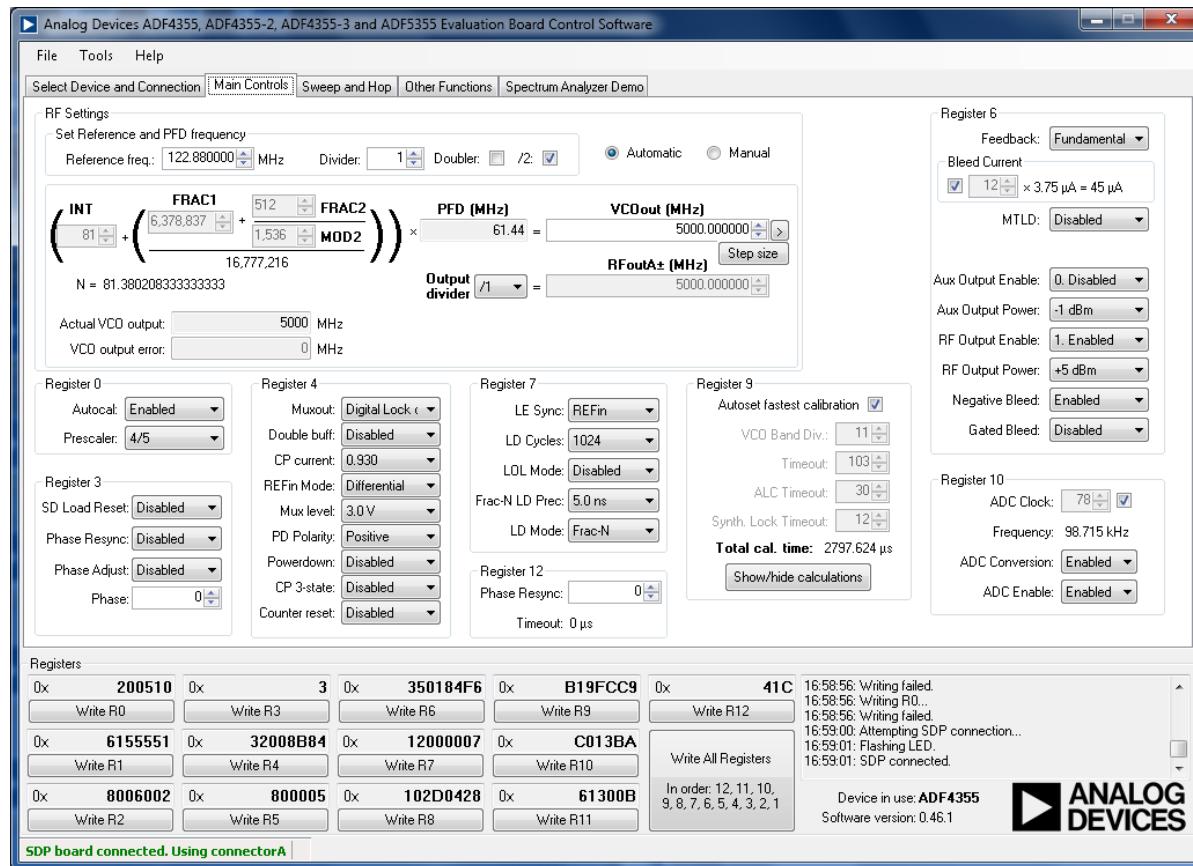

Figure 5. Software Front Panel Display—Main Controls

EVALUATION AND TEST

To evaluate and test the performance of the [ADF4355](#), use the following procedure:

1. Install the [ADF4355](#) software (see the [PLL Software Installation Guide](#)).
2. Follow the hardware driver installation procedure (Windows XP only).
3. Connect a 50 Ω terminator to RFOUTA-.
4. Connect the [EV-ADF4355SD1Z](#) board to the [SDP-S](#) board.
5. Connect the 6 V power supply to the banana connectors and power-on the board using S1 (check that LED1 is on).
6. Connect the USB cable from the [SDP-S](#) board to the PC.
7. Run the [ADF4355](#) software.
8. Select **ADF4355** and **SDP board (black)** in the **Select Device and Connection** tab of the software front panel display window (see Figure 2).
9. Click the **Main Controls** tab, and set the **VCOout (MHz)** to a frequency of 5000 MHz.
10. Click **Write All Registers**.
11. Connect the spectrum analyzer to SMA connector RFOUTA+, see Figure 4 for a typical evaluation setup.
12. Measure the output spectrum and single sideband phase noise.

Figure 6 shows a phase noise plot of the SMA RFOUTA+ equal to 5 GHz.

**ESD Caution**

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL resistorTRICITIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR representations OF ANY KIND WITH resistorPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY representations, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPresorS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES resulting FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
