

**SEPIC LED Driver**

ON Semiconductor

Device	Application	Input Voltage	Output Power	Topology	I/O Isolation
CS5171	Miners Light	4 Vdc	2 W	SEPIC	NO

Other Specifications				
	Output 1	Output 2	Output 3	Output 4
Output Voltage	3.5 V	N/A	N/A	N/A
Nominal Current	350 mA	N/A	N/A	N/A

Minimum Efficiency	70%
Operating Temp. Range	0 to +70°C

Circuit Description

This application is for the LED driver to be powered from a source that can be higher or lower than the LED voltage and must be efficient as possible. The SEPIC topology was chosen. The schematic in the following page shows a 4 V SEPIC LED driver using the CS5171 as a DC-DC boost regulator. The CS5171 operates at 260 KHz with about 65% efficiency with a 4.0V input. The MBRM110LT1 is a 10V schottky diode with a forward drop of < 0.3V. The NCS2001 operates as amplifier for the current sense voltage across R2 and drives the feedback pin on the CS5171.

Key Features

- SEPIC LED Driver
- 350 mA LED Current
